

New Acer Aspire Z5761: A touch of style and performance

Manno, January 2011 – Watch HD movies and TV, play advanced games, enjoy immersive audio or be productive if you need; add the user-friendliness of the multi-touch screen and you have found the ultimate multi-tasker: the Acer Aspire Z5761.

Combining great performance, excellent entertainment and stylish modern design, this all-in-one desktop heralds next generation computing.

Thanks to the screen with multi-touch functionality, the Aspire Z5761 not only offers a dynamic user experience, but also delivers one of the easiest ways of interacting with your PC and integrating all your multimedia contents. Starting point for this smarter way to access the PC

and the web, the Acer TouchPortal provides a truly hands-on experience bringing together a full suite of touch enhanced applications and gadgets for fun and entertainment:

- TouchBrowser is a touch-friendly web browser designed for searching, retrieving and presenting information from the Internet.
- TouchCam features handy touch controls to add fun video effects while chatting online, or do theme-style recording and share with friends on YouTube™.
- TouchMusic, lets you browse, manage and play your favourite music.
- TouchPhoto integrates photo management with photo sharing capabilities and is designed to interact with both local images and online albums.
- TouchVideo includes video management and sharing features. It allows you to enjoy Blu-ray or DVD movies and home videos, as well as browse and share your videos to YouTube.

But the Acer TouchPortal is not the only way the Aspire Z5761 brings your digital life together. It also comes with Clear.fi, Acer's new media sharing system based on the idea that it's easier if all multimedia content is simply brought into a single system with a common interface. No matter where they are. Clear.fi is a cross-platform solution that works straight out of the box, automatically detecting the Clear.fi-enabled devices connected to the wireless home network, and then allowing all digital content stored on any of these to be shared seamlessly using the Clear.fi media interface.

Featuring a modern, minimalist design, the Aspire Z5761 easily fits into any décor, gracing any living or working space with a sophisticated look and feel. Sharp-cut geometric lines set off the combination of aluminum with matt and glossy black surfaces, creating a luxurious effect. Cool blue lighting placed above the integrated speakers lights up the keyboard. When not in use the keyboard can be nicely tucked away below the PC, enhancing the overall minimalist look as well as increasing the free area in front of the desktop. Inspired by modern art, the silver stand is designed with a window for organizing cables while keeping a simple, yet stylish design.

Performance-wise, this is an advanced PC, rich of cutting edge technologies engineered to convey an enhanced computing experience. Exploiting the 2nd generation Intel® Core™ processor family, that features Intel® Turbo Boost Technology 2.0, capable of increasing performance in response to the most demanding tasks such as editing multimedia files, or

playing fast-paced games, this desktop can deliver optimal speed enabling smoother multitasking and ensuring maximised entertainment and productivity. What's more it combines turbo-charged computing power with energy efficiency.

Top-quality visual and audio components make the most of your entertainment. With a spacious 58.4 cm (23") Full HD 1080p 16:9 display, fast 5ms response and powerful graphics solutions, you will catch even the tiniest details of your favourite movies, games, pictures, and digital TV thanks to ultra-sharp and colorful imagery. Captivating and immersive audio is brought about by an integrated 5W stereo speaker system and professionally tuned Dolby® Home Theater® v4.

With a Blu-ray Disc™ optical drive (optional), multi-in-one card reader, and TV-tuner (optional) these models bring together all facets of your digital life, from movies to games, from TV to pictures: an all-in-one design also in terms of entertainment.

Full connectivity is ensured by the most advanced wireless and wired technologies: 802.11b/g/n network connection, Gigabit LAN and optional built-in Bluetooth® 2.1. The built-in microphone and high definition webcam will help you keep in touch with friends and family through video chats and conference.

In terms of storage, up to 1.5TB of capacity offers plenty of space for all your digital archives. Up to 8GB of DDR3 memory ensure seamless running of most demanding application, while a total of eight USB port supplies handy connection to all your peripherals.
